

# Feed, Protect, Care Collaborative Platform

Are you interested in sustainable **food systems**?

Are you committed to **sustainable development**?

Would you like to join an **international collaborative** research network and develop your **scientific leadership** on the subject?

**Travel and accommodation expenses are covered by the platform. A \$2,000 scholarship is also offered by the Faculty of Graduate and Postdoctoral Studies**

## Objective

Global platform for future leaders in sustainability science, offering an innovative space to study the interconnected challenges of food, human well-being and environmental protection.

## Theme

How can food systems play a crucial role in improving public health outcomes, particularly for the most at-risk populations, and in preventing the global rise in chronic disease?

## Important dates
